Subject: AWG Data Collection Form

Hi all,

Attached is a draft data collection form for the AWG. The form includes 3 different scales for the AWG (Large, medium, small). We can discuss if it is worthwhile to assess all scales – I believe you just have the medium scale system to test. Within the data form, rows can be added if we are interested in assessing additional scenarios. The second sheet includes scenarios to select for the bottled water comparison. Please let me know if you have questions and/or think we should add/remove any of the parameters. We did fill in some sample cells with the background information from WaterGen.

Thanks,
Sarah
